DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conmy et al. U.S. Patent 6,101,480 [Conmy], and further in view of Schuster et al. U.S. Patent 6,577,622 B1 [Schuster].

As per claims 1, 14, and 22:

Conmy discloses the claimed invention except for the primary user using a wireless scheduling device. However, Conmy does disclose the concept of mobile and disconnected users being provided the same C&S (calendar and scheduling) functionality that is available to them when they are connected to the LAN. Col. 11, lines 3-15. Schuster teaches that it is known in the art to provide a PID (Protocol identifier) interface such as a PDA (Personal Digital Assistant). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the C&S system of Conmy with the PID interface of Schuster, in order to permit the user to be mobile and use his PDA for scheduling meetings and being kept up to date on the meetings he is scheduled to attend.

Art Unit: 3621

5

The examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one skilled in the art would be motivated to make the proposed combination of primary and secondary references. In re Nomiya, 184 USPQ 607 (CCPA 1975). However, there is no requirement that a motivation to make the modification be expressly articulated. The test for combining references is what the combination of disclosures taken, as a whole would suggest to one of ordinary skill in the art. In re Simon, 174 USPQ 114 (CCPA 1972); In re McLaughlin, 170 USPQ 209 (CCPA 1971). References are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. In re Bozek, 163 USPQ 545 (CCPA 1969). Schuster is a system that is scheduling and bringing together participants in a conference call/meeting. Both Conmy and Schuster deal with bringing participants together at a common time and place. Conmy's place is physical while Schuster's place is primarily electronic. The end results are both effectively the same. That is multiple participants having the ability to communicate and interact with each other within the same time period.

communicating an availability request to a server using the scheduling device, the server having access to calendar data for each attendee in the set of attendees; Conmy, Col. 4, lines 12-40.

in response to the availability request, conducting a search of the calendar data of each attendee of the set to produce an availability data set; Conmy, Col. 4, lines 55-67.

Art Unit: 3621

transmitting the availability data set to the scheduling device. Conmy, Col. 5,

lines 3-10.

Conmy discloses the claimed invention except for the use of a wireless device.

However, Conmy does teach about utilizing wireless devices as detailed in the previous

section. Schuster teaches that it is known in the art to use a wireless device for C&S. It

would have been obvious to one having ordinary skill in the art at the time the invention

was made to provide the C&S system of Conmy with the wireless capabilities of

Schuster in order to provide the user with greater flexibility in the use of their time.

As per claims 2, 15, and 23:

Conmy and Schuster further disclose:

displaying data derived from the availability data set on the wireless scheduling

device. Conmy, Fig. 5-9.

As per claims 3, 16, and 24:

Conmy further disclose:

wherein the data derived from the availability data set is displayed as free time and

busy time. Fig. 5-9.

Page 4

Art Unit: 3621

As per claims 4 and 17:

Conmy further disclose:

wherein the availability request is communicated to the server via a network. Col.

4, lines 14-30.

As per claims 5 and 18:

Conmy further disclose:

wherein the network includes the Internet. Col. 4, lines 14-30.

As per claims 6, 19, and 25:

Conmy further disclose:

wherein the availability request includes an identifier for each attendee and a time period for which availability should be determined. Col. 3, lines 50-55, lines 55-64.

As per claims 7, 20, and 26:

Conmy further disclose:

wherein the identifier for each attendee is an email address. Col. 3, lines 50-55.

As per claims 8 and 21:

Conmy further disclose:

wherein the calendar data for each attendee is stored in an availability database in communication with the server. Col. 4, lines 1-10.

Art Unit: 3621

As per claim 9:

Conmy further disclose:

scheduling an event based on the availability data set. Fig. 3-4.

As per claim 10:

Conmy discloses the claimed invention except for the wherein the event is scheduled using the wireless scheduling device. Schuster teaches that it is known in the art to provide wherein the event is scheduled using the wireless scheduling device. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the C&S system of Conmy with the wherein the event is scheduled using the wireless scheduling device of Schuster, in order to provide the user with greater flexibility and availability.

`As per claim 11:

Conmy further disclose:

updating the calendar data for each attendee with the scheduled event. Col. 5, lines 52-62.

As per claim 12:

Conmy further disclose:

requesting access to the calendar data for each attendee in the set of attendees.

Col. 5, lines 35-51.

Page 6

Application/Control Number: 09/814,563 Page 7

Art Unit: 3621

As per claim 13:

Conmy further disclose:

wherein access to calendar data is requested via email over the Internet. Col. 9, lines 10-15.

Examiner's Note: Examiner has cited particular columns and line numbers in the references as applied to the claims below for the convenience of the applicant.

Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsuji et al. U.S. Patent 6,522,347 B1.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel L. Greene whose telephone number is 703-306-5539. The examiner can normally be reached on M-Thur. 8am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James P. Trammell can be reached on 703-305-9768. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
